Open Scholarship in the Digital Era

During the past two decades, the word “open” has proven to describe a complex concept with challenging and inspiring implications for individuals, institutions and jurisdictions. New expressions such as “open access” have now been joined by new words such as “copyright” in a multi-dimensional and multi-layered discussion around appropriate policies and practices on campus and beyond. This presentation will reflect on the deep conceptual changes that are driving this discussion as well as examine some of the promising steps forward taken in recent years.

Wednesday 26 October | 12:00–1:30 pm

OISE Library | 252 Bloor Street West | Ground Floor | Live Presentation

@ OISE LIBRARY—Space is limited. Register at <http://uoft.me/register> if you plan to attend.
